

YANGAREDDY SAHITHI

sahithiyangareddy6@gmail.com | [LinkedIn](#) | [Github](#) | +91 9493642691

Professional Summary

Entry-level Data Analyst skilled in Python, Pandas, NumPy, SQL, and Power BI with hands-on experience in data cleaning, visualization, and dashboard creation. Built analytical projects using real-world datasets to derive insights and support business decision-making.

Education

JNTUA College Of Engineering
B.Tech in Computer Science & Engineering
Sri Chaitanya Junior College
MPC

Pulivendula
2023-2027(Expected)|CGPA: 8.06
Anantapur
2021-2023 | CGPA:9.28

Technical Skills

Programming: Python, SQL

Data Analysis: Data Cleaning, Data Preprocessing, Exploratory Data Analysis (EDA), Statistical Analysis

Data Visualization: Power BI, Microsoft Excel, Matplotlib

Dashboard Development: Power BI, Interactive Dashboards, KPI Reporting

Database: SQL Queries

Tools: VS Code, Git, Microsoft Excel

Analytical Skills: Data Interpretation, Decision Support, Data-Driven Recommendations

Projects

Netflix Data Analysis | [Github](#)

- Analyzed the Netflix Titles dataset using Python (Pandas, NumPy) to clean, preprocess, and explore content trends across movies and TV shows.
- Performed Exploratory Data Analysis (EDA) to identify patterns based on content type, genre, release year, country, ratings, and duration.
- Built an interactive Power BI dashboard featuring KPIs, filters, and visualizations to monitor content distribution and user-driven insights.
- Generated data-driven business recommendations by identifying trends in content production, regional availability, and audience preferences to support strategic decision-making.

Sales Data Analysis Dashboard | [Github](#)

- Analyzed 10,000+ sales records using Python and Pandas to identify top-performing products and improve reporting insights
- Identified revenue trends and top-performing products
- Created visualizations and built a Power BI dashboard

Student Performance Analysis | [GitHub](#)

- Studied relationship between study hours and student scores
- Performed data cleaning and exploratory data analysis
- Used visualization techniques to identify patterns

COVID-19 Data Analysis | [GitHub](#)

- Analyzed real-world dataset to study trends and recovery rates
- Compared country-wise performance and generated insights
- Generated insights using Python libraries like Pandas, NumPy and Matplotlib

Achievements

- Built multiple end-to-end data analytics projects using real-world datasets.
- Designed interactive Power BI dashboards with KPI tracking.
- Presented business insights through analytical reports.
- Actively learning machine learning and statistical analysis.

Certifications

- Data Analytics Job Simulation - Deloitte - Forage | Credential : [Certificate](#)
- AI – Data Engineering Analyst - Skill India Digital Hub | Credential : [Certificate](#)
- Python DataStructures - Coursera | Credential: [Certificate](#)
- Python Programming - Reliance Foundation Skilling Academy | Credential : [Certificate](#)
